HANDLE COLOUR GUIDE

BLACK

Black handles are a staple for contemporary and modern kitchens. When using brilliant white cabinetry, a matt black knob or pull handle would contrast well here:

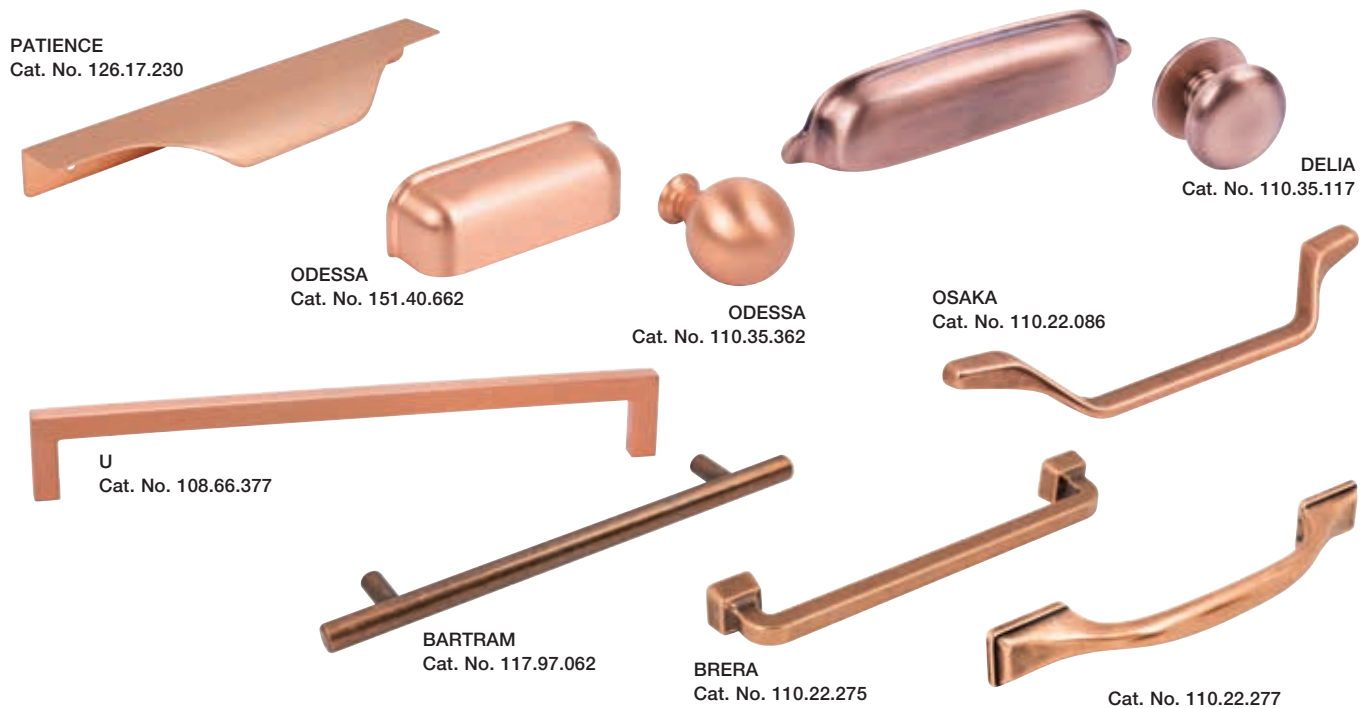

GOLD & BRASS

Gold and brass finishes are some of the most popular amongst kitchen designers. Gold is a versatile colour that can be used in a variety of ways to complete the perfect kitchen style. Brass is becoming increasingly popular because of the finish it provides in a dark toned kitchen. Our midnight blue York slab door is the perfect partner for either brass or gold handles. Browse our gold and brass handle range throughout the brochure with our best sellers here:

COPPER

Like gold, copper is very versatile, and like brass matches perfectly with darker colours. A brushed brass finish in a kitchen can also create a stunning impact-finish to those seeking a country or traditional look.

CHROME

Chrome handles are ideal in a modern looking battleship grey kitchen as well as a more traditional white or cream styled kitchen. When used correctly chrome finishes provide a beautiful final touch to the most popular room in the house.

Timber Grain Knobs

Timber knobs are available in two versions, routed cross grain and turned end grain. Routed knobs have the cross grain on top, like you have on a wooden front. Turned knobs have the end grain on top of the knob

Cross grain knobs -

Individually routed from a fixed wooden block with a full shaped tool. Each knob is then sanded to the final shape. This method of manufacture makes for a higher quality knob that shows the natural wood grain to it's best

End grain knobs -

Traditional turned knobs are turned on a copy lathe from a long turning wood dowel and cut off automatically. This method of manufacture is faster and produces a more economical and cost effective product

Oak, unfinished

Oak, antique oak stained and lacquered

Product is subject to variations in colour and dimensions due to being manufactured from natural materials

Timber Grain Knobs

Timber knobs are available in two versions, routed cross grain and turned end grain. Routed knobs have the cross grain on top, like you have on a wooden front. Turned knobs have the end grain on top of the knob

Cross grain knobs -

Individually routed from a fixed wooden block with a full shaped tool. Each knob is then sanded to the final shape. This method of manufacture makes for a higher quality knob that shows the natural wood grain to it's best

End grain knobs -

Traditional turned knobs are turned on a copy lathe from a long turning wood dowel and cut off automatically. This method of manufacture is faster and produces a more economical and cost effective product

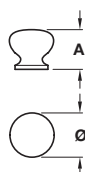

Oak, unfinished

Beech, unfinished

GOLA Profiles for Handle Free A

Profiles for recess mounting in the cabinet carcass to create a stream

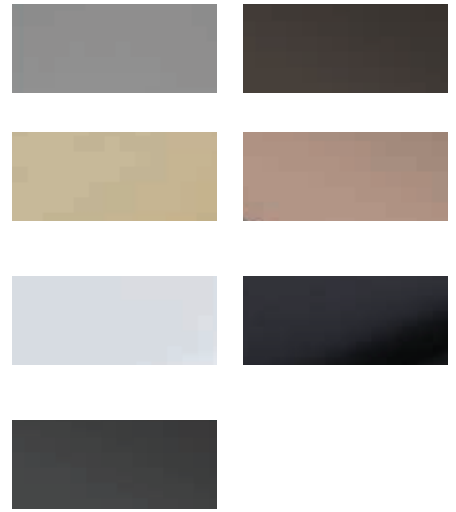

Gola Profile systems are ideal to achieve a design. Compared to more traditional cabin give a flush-fitting, handle-less style. You c similar tone to the cabinet for a seamless fi will make more of a contemporary design s

Our on-trend range of complementary Gola maximum style and functionality.

There are six different systems in a choice to suit a variety of different applicat

Key features:

- > Choice of 7 finishes; anodised or powder coa
- > High quality, on trend design
- > Extensive variety of options

System B Plus, System C Plus, System D and System E profiles with aluminium plinth profile, graphite powder coated finish

System B Plus and System C Plus profiles,
silver anodised finish

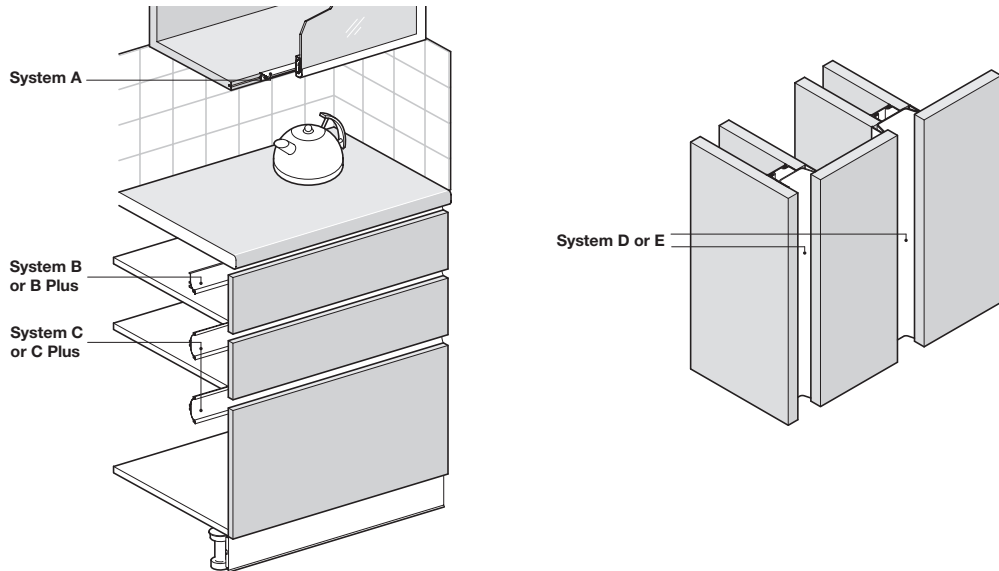

System B Plus and System C Plus profiles with aluminium plinth profile,
brushed copper anodised finish

Dimensional data not binding. We reserve the right to alter specifications without notice.

GOLA system profiles are available for different applications where a streamlined handle free look is required.

- > **System A:** For horizontal fixing under wall units; page **339**
- > **Original system B:** For horizontal fixing under worktops, with plastic connectors; page **340**
- > **Original system C:** For horizontal fixing between doors and drawers, with plastic connectors; page **341**
- > **System B Plus:** For horizontal fixing under worktops, with aluminium profile connectors; page **342**
- > **System C Plus:** For horizontal fixing between doors and drawers, with aluminium profile connectors; page **343**
- > **System D and E:** For vertical fixing between doors; pages **344-345**

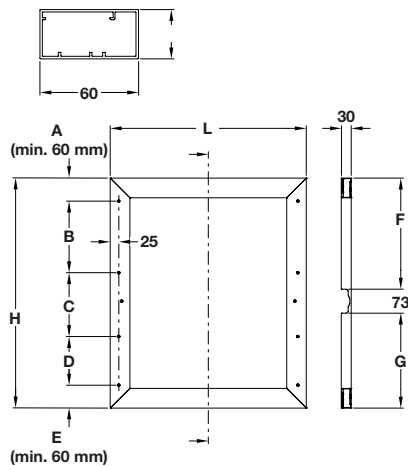

Please note: The Gola profile dimension does not allow for use with a fully integrated dishwasher, the profile stops at the dishwasher. The dishwashers door will need a handle

Installation Tools

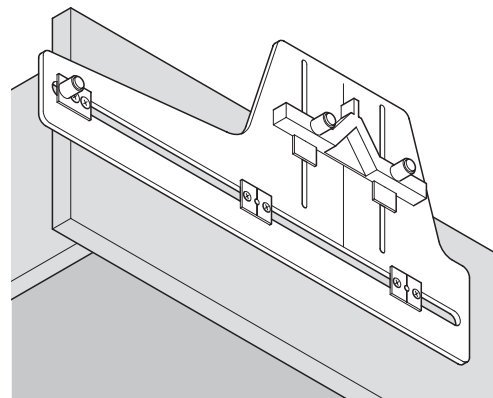

A simple jig which accurately marks out door and drawer fronts in preparation for fixing handles and knobs

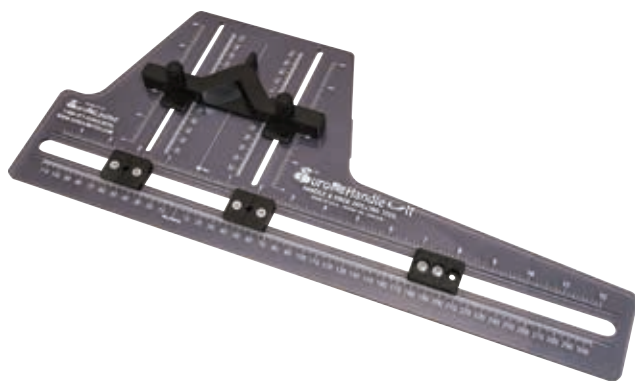

For drilling on doors or flaps

For drilling on flaps at 45° angle

For drilling on panels

Handle and knob drilling jig

- > V-notch in fence for use in installing handles at a 45° angle
- > Imperial and metric scales for use on all handles
- > Height adjustment to the centre of a 300 mm high drawer front
- > Movable positioning stop for use on drawer fronts of the same size
- > Installs handles as large as 600 mm
- > Made of polycarbonate (jet aircraft canopy material), this jig is virtually unbreakable
- > Order qty: 1 pc

Item	Cat. No.
Drilling jig	001.35.001

Step 1
Firstly, determine the distance from the top of the door where the first hole is required

Step 2
Then determine the distance from the side of the door where the first hole is required

Step 3
Using either a 2 mm pilot drill bit or an awl, mark the door where the first hole is required

Step 4
For a standard centre, simply off the scale the desired hole centres and mark the door with the position of the second hole

Step 5
The jig is now set up for all doors in the kitchen and each door can quickly be marked out ready for drilling

Handle jig

- > Simple jig which accurately marks out door and drawer fronts in preparation for fixing handles and knobs
- > Green/black plastic - colour may vary
- > Order qty: 1 pc

Item	Cat. No.
Door handle jig	001.35.030

Care & Maintenance

We advocate the use of a dry cloth only to clean handles. Please do not under any circumstances use any form of metal cleaner or aerosol spray. Our microfibre cloth is perfect for cleaning all types of handles and knobs without using chemicals that could damage the surface finish

AluSplash microfibre cloth

- > 310 x 285 mm
- > Perfect for use with VuPlex® plastic cleaner
- > Order qty: 1 pc

Colour	Cat. No.
Blue	007.32.135
