**Ideal for Private, Educational and Corporate environments**  
**Manufactured to BS 6222 Part 2 Level H**  
**FSC<sup>®</sup> and EN14322 Certified**

If you are trying to find ways to boost the eco-credentials of your projects then look no further than MFC. A key product in the EGGER Decorative Collection, MFC is the right choice for those looking for a surface that meets the demands of an interior without compromising on the finish. It provides a realistic, durable and versatile surface that can be used across multiple applications. MFC creates a design statement that is robust and functional. This is often difficult to achieve with alternative materials, but thanks to the flexible and hardwearing surface design aspirations can be met

Thanks to its chipboard core, MFC stores more carbon than is required to produce it. This results in a carbon negative decorative surface that contributes towards net zero.

Take a closer look the Environmental Product, Environmental Health and Technical Datasheets for MFC to see how it can benefit your projects.

#### 4 Reasons to specify EGGER Melamine Faced Chipboard

- 1 Available immediately in 100 woodgrain, material and uni-colour decors.
- 2 Laminated board ready for cutting. Easy to cut, edge and process.
- 3 No oiling, staining or other protective measures required.
- 4 Made using 40% recycled wood, 40% sawmill by-products and 20% fresh resources.
- 5 Negative carbon footprint of -13.3kg CO<sub>2</sub>/M<sup>2</sup>.
- 6 100% recyclable following use.
- 7 Produced in the UK following EGGER's closed loop production cycle.
- 8 Offers a realistic, robust and cost effective alternative to real wood or veneer.
- 9 High resistance to heat, impact, scratches, wear and water vapour.
- 10 Can create a coordinated finish with matching board and edging.
- 11 Provides a safe antibacterial and lightfast surface.
- 12 Cost effective and easy to maintain and clean.
- 13 Suitable for private and commercial interiors including table and desktops, bars, reception desks, and doors.
- 14 Complies with REACH, LEED, BREEAM, WELL, DGNB and Nordic Swan standards.
