- **stainless steel**
- 4 cooking zones
- 6 power levels
- rotary control
- 25amp connection - cable supplied
- dimensions: W590 x D510mm

INDUCTION HOBS

Our range of induction hobs are a sleek contemporary addition to any kitchen. They are simple to use and provide economy and a swift cooking experience with instant heat at the touch of a button.

These fast and ultra-efficient hobs are highly responsive as they use a magnetic field to generate heat, making induction a quicker cooking option than using a gas or electric hob. This makes it an efficient way to cook your meals, and great news for you and the environment.

DOMINO HOBS PERFECT FOR SMALL SPACES OR COMBINING COOKING STYLES

UBTC30FLC 30cm domino ceramic hob

- plug and go with 13A fitted plug
- can be converted to a 32A connection
- dimensions: W590 x D520mm

OUR INDUCTION HOBS COME WITH SOME GREAT STANDARD FEATURES

TOUCH CONTROLS enable you to select the cooking zone and the power level with ease.

POWER LEVELS - with up to 9 power levels you have the flexibility to suit your cooking needs.

EASY CLEANING - simply wipe down with a damp cloth after use and it will look as good as new.

RESIDUAL HEAT INDICATOR is a great safety feature. The letter 'H' appears and will flash to warn you when the surface is still too hot to touch.

AUTO PAN DETECTION SYSTEM is another great safety feature. If your pan is undetected the hob will not work. This is why they are so much more energy efficient.

PLUG & GO - our induction hobs are supplied with a 13A fitted plug for easy installation. Simply plug in and ready to start cooking!

WOKSSi
stainless steel gourmet wok for use with induction hobs
